Nocturnin (CCR4 protein homolog).
CCRN4L OR NOC OR CCR4.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         entities requires a license agreement (See http://www.isb-sib.ch/announce/or send an email to license@isb-sib.ch).
        and circadian regulation.";
Submitted (OCT-1999) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: COMPONENT OF THE CIRCADIAN CLOCK OR DOWNSTREAM EFFECTOR OF CLOCK FUNCTION. EXHIBITS A HIGH AMPLITUDE CIRCADIAN RHYTHM WITH MAXIMAL LEYELS IN EARLY EVENING. IN CONSTANT DARKNESS OR CONSTANT LIGHT, THE AMPLITUDE OF THE RHYTHM DECREASES (BY SIMILARITY).
-!- SIMILARITY: BELONGS TO THE CCR4/NOCTURIN FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Biological SEQUENCE

 Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                         108

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   This sequence represents the human CD40 receptor associated protein (CRAP). CRAP is a functional protein capable of interacting with the cytoplasmic domain of CD40 and/or other receptors of the tumour necrosis factor (TMF) receptor superfamily such as CD30 and TMF receptor I, where the protein has no homology to TMF receptor associated factor (TRAF) proteins. The CD40 binding proteins can be used as modulators of the CD40 signalling pathway, especially to diagnose and treat TRAF-related, CD40-related, NF-kappaB related and/or Jun (kinase)-related diseases, and for the improvement of anti-tumour diseases. Diseases which may be treated include atherosaclerosis, arthritis, multiple sclerosis, systemic lupus erythematosus, graft rejection, graft versus host disease, allergy, and autoimmune disease. The proteins can be used to sensitize tumour cells to anti-timour treatments and treases.
